- 2 independent motors: 1 internal and 1 external for perineum play
- 100% waterproof (bath friendly)
- 100% body safe silicone (phthalate-free)
- Quiet, yet powerful
- Sleek and completely seamless with a velvety-smooth surface
- 2 hours charge gives 2 hours pleasure
- Available in 2 shades: black & purple

### Why Nuo?

#### Partner-controlled or solo play

Partner play becomes more of a tease with our elegant remote and easy-to-use app. Our discreet interfaces also make solo play all the more enjoyable.

#### Comfort shape

Nuo is a uniquely different anal toy, shaped with a gentle curve and bulbous 'body'. The slender base follows the body's natural lines and allows the toy to nestle between the buttocks and stay in place with ease.

#### Prostate play

Rotate Nuo with the curve facing upward (towards the direction of the belly button) to better access the prostate (aka P-spot), one of the most sensitive erogenous zones in the male body. Tilt and rock Nuo to explore depths and intensify the experience to your satisfaction.

#### Posterior preparation

Nuo boasts a unique width at its stem that makes it an ideal toy to use in preparation for anal sex.

## Enhanced stimulation

Nuo's slender base features an independent motor that stimulates the perineum – an incredibly sensitive, yet oft-overlooked, erogenous zone.

## Safety

- **Do not** attempt to insert Nuo completely into the anus. The base should sit comfortably outside of the body.
- Lubricate Nuo and the anus **liberally** prior to insertion. Use water-based lubricant **only**.
- **Do not** use desensitizing sprays or crème prior to insertion. Our bodies have pain sensors for a reason!
- Clean Nuo **immediately** prior to use.
- Nuo can be used for either anal OR vaginal play. To avoid bacteria transfer **do not** swap Nuo from the anus to the vagina without cleansing the toy first.

## A swift guide to safe anal play

- **The anus is 'endless'**  
There is no stopping point in the rectum, and anything inserted in its entirety is at risk of entering the intestine and being irretrievable. Should this occur, seek medical attention immediately.
- **Take it slow**  
Anything inserted into the rectum must be liberally lubricated to prevent damaging the sensitive and thin tissue inside this orifice. Water-based lubricant only is recommended for use with Nuo. The anus requires 'foreplay' prior to any kind of insertion.
- **Relax & communicate**  
Anal penetration feels comfortable the more relaxed you feel. Take deep breaths and be sure to communicate what feels good – and what doesn't! – to your partner.

## How to use Nuo

To turn Nuo on, press and hold the push-button at the end of its base for 3 seconds. To sync with the Je Joue pen remote, press the remote's top button and wait a few seconds until the toy starts vibrating. Once connected, simply press the button again to go through its different pulsation patterns. Twist the button clockwise to increase the speed and twist anti-clockwise to decrease the speed.

Each press of the button will run through the following pulsation patterns:

- Pattern 1 (Cascade) – linear vibration from both external and internal motors
- Pattern 2 (Pulse) - linear vibration from external motor only
- Pattern 3 (Soft) - linear vibration from internal motor only
- Pattern 4 (Intense) – alternate vibration from both external and internal motors
- Pattern 5 (Energize) – alternate 2 external stimulation for 1 internal vibration
- Pattern 6 (Glow) – linear external stimulation and ascending internal vibration
- Pattern 7 (Mood) – ascending vibration from both external and internal motors

To turn Nuo off, press and hold the push-button at the end of its base for 3 seconds.

The Je Joue remote control runs on 1 AAA battery (not included).

### **Je Joue app**

Nuo can also be controlled using the free Je Joue app (where available) in place of the remote control.

### **Charging**

To charge Nuo, place the charging dock directly over Nuo's ON button. You will feel its magnetic core pull it into place. When charging, a light will flash. When fully charged, the light will remain steady on until the charging dock is removed.

### **Lubrication**

Water-based lubricant only is recommended for use with Nuo.

### **Cleaning**

Wash Nuo with warm water and pH neutral soap.
